

## eZ-Connect Series: Sensor Interchangeable Amplifier eZT

- One amplifier for use with various load cells without readjustment.
- Interchangeable sensors of different types; compression, tension, torque and more.

For example...

For small force  
 (e.g. Approx. 3N)

For large force  
 (e.g. Over 1000N)

For measuring both...

Small

Large

Small capacity load cell

High capacity load cell

Only one amplifier enables both measurement!

For example...

For compression/tension  
 (e.g. durability,  
 rupture test)

For torque  
 (e.g. screw tightening,  
 loosening test)

For measuring both...

Compression/  
 tension

turning/  
 twisting

Load cell for compression/tension

Load cell for torque

Only one amplifier enables both measurement!

\*Please calibrate (check the conformity of the indicated value) before use or ask us for calibration service (See page 2 for details.).

### [Interchanging the load cells]

<p>Load cell connected</p>	<p>Simply disconnect it and connect another</p>	<p>Ready for next measurement</p>

### [Cautions]

#### 1. Accuracy

Overall accuracy is calculated as the total of the accuracy of amplifier (+/- 0.2%F.S.) and load cell (see each specification sheet):

For example... eDPU-50N

 Amplifier (+/-0.2% F.S.)	+	 eDPU (+/-0.2% F.S.)	=	Overall accuracy +/-0.4% F.S.
---	---	--	---	-------------------------------

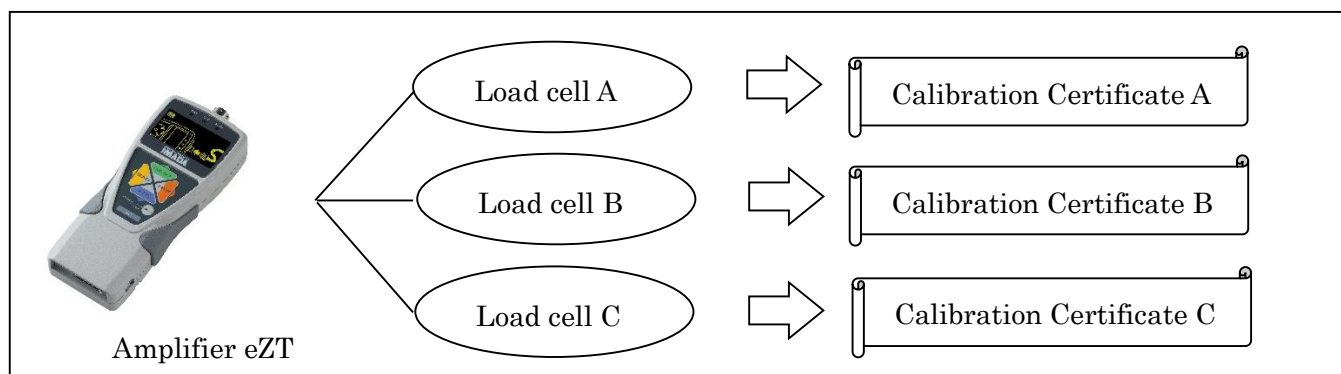

\* For measurement requiring higher accuracy, there are 'Separate Sensor Model ZT series' and 'Desktop Force Amplifier FA Plus', which are calibrated individually to each load cell. Please refer to the specification sheet of Separate Sensor Model ZT series.

#### 2. Accuracy Warranty

Please calibrate before using eZ-Connect series.

The amplifier is not calibrated with any load cell.

Please request calibration for each combination and calibration report if required (available at a charge).

\*Please contact us for details of our calibration service.

## [Specifications of eZT]

Model	eZT
Accuracy	+/-0.2%F.S. (*1)
Unit of measurement	Depends on load cell and settings (N, kN, kgf, lbf N·m, N·cm, kgf·m, kgf·cm, lbf·in, ozf·in)
Display	4-digit
Display update	16 / sec
Sampling rate	2000 data / sec at maximum (*2)
Battery	8 hours (2 hours charge) (*3)
Operating environment	Temperature: 0 to +40 degree Celsius, Humidity: 20 to 80%RH
Functions	Customized display (header and footer), Peak hold (tension and compression), Internal 1000 points data memory, Comparator (judgment of OK or NG), Reversible display, Sign inversion, Zero clear timer, +NG alarm, Off timer (auto power off), Dumping, Time display, 1st/2nd peak, Displacement detection at force peak value, Displacement zero reset at selected force, setting lock
Output	USB, RS232C, Mitutoyo digimatic (*4), 2 VDC analog output (D/A), Comparator 3 steps (-NG/OK/+NG), Overload alarm, Sub comparator 2 steps (output of large or small judgment), USB flash drive, Displacement.
Overload warning	Approx.110%F.S. (Warning message and alarm)
External connecting switch	SEND (a point of contact holding), Zero reset, Peak ON/OFF setting
Available liner scales (*5)	- Online driver output (a line receiver according to RS422/485 must be built in.) - Open collector output (Voltage drop between contacts must be smaller than 0.5V.)
Weight	Approx. 490g
Dimensions	Please refer to dimensions.
Accessories	AC adapter, CD driver (including simple software for data logging), Force Recorder Professional (Trial ver.) Attachments (The set of attachments varies according to range.), USB cable, Carrying case, Adaptor for USB flash drive (*6)

\*1 The accuracy of load cell is added when using connected with a load cell.

\*2 Up to 100 data/sec. is saved in USB memory (selectable among 1, 50, and 100 /sec)

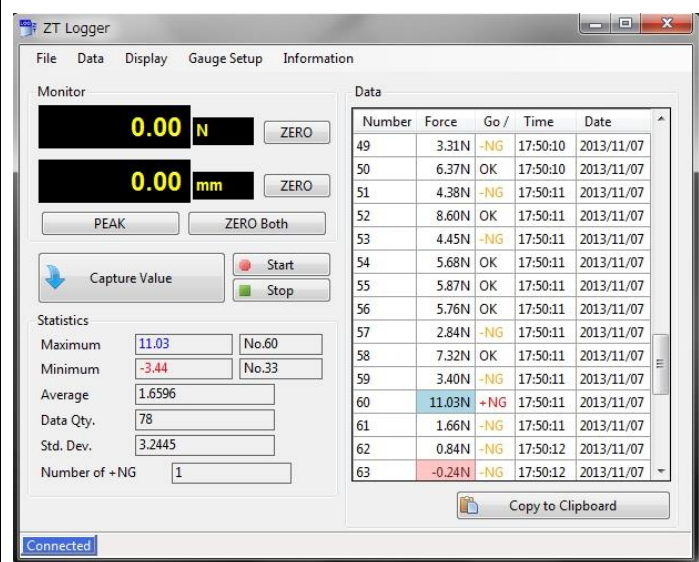

\*3 The battery is more consumed when connected to USB flash drive or a linear scale.

\*4 Not always available for Mitutoyo digimatic products.

\*5 Some linear scales could not be available even if they meet the mentioned specifications.

\*6 USB flash drive is not included.

## [Included Accessories]

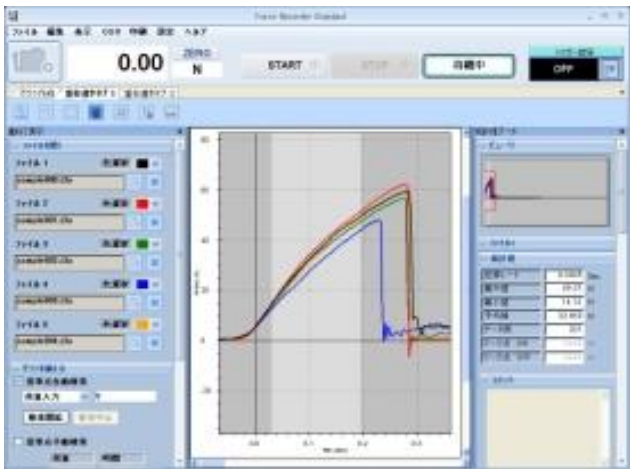

<p><b>Easy and reliable data management on PC</b></p> <p><b>ZT-Logger</b></p>	<p><b>Main functions</b></p> <ul style="list-style-type: none"> <li>- Captures peak data (*1)</li> <li>- Captures continuous data (10 data /sec) (*1)</li> <li>- The recall of memory data (*1)</li> <li>- Saves data in CSV format</li> <li>- Prints out the report</li> </ul> <p><b>Operating environment (*2)</b></p> <ul style="list-style-type: none"> <li>- OS: Windows XP/Vista/7/8/8.1 (32bit/64bit of 7/8/8.1)</li> <li>- CPU: more than 1GHz</li> <li>- Memory: more than 1GB</li> <li>- Hard disk : more than 2GB</li> <li>- .NET Framework4 later</li> </ul> <p>*1 Available data: Force, Displacement, Time</p> <p>*2 Please note that the software may not work in all environmental combinations.</p>	
---	--	--

## [Application of Force Gauge]

ZT series enable...

1. Controlling external equipment according to load value. (e.g. To stop or change operation of machine at a selected load value.)
  2. Adding a certain load value. (e.g. To maintain sample pressed at a chosen load value.)
  3. Producing inspection device synchronized with work process. (e.g. To improving efficiency of inspection process.)
  4. Finding inferior goods earlier with OK/NG judgment function.(e.g. To do quality control thoroughly)

### [Related Cable]

Model	Explanation	Purpose of use
CB-108	Analog cable	To connect to a multi meter, oscilloscope.
CB-118	Analog cable (For -AN option)	To connect to a multi meter, oscilloscope.
CB-208	RS232C cable	To connect to a PC having its own system
CB-308	Digimatic cable	To connect to a printer DP-1VR
CB-508	Test stand option cable (For MX)	To connect to a test stand to enable force control or overload prevention functions.
CB-518	Test stand option cable (For MX2,EMX)	To connect to a test stand to enable force control or overload prevention functions.
CB-718	Test stand connection cable for displacement measurement (For MX2-FA)	To connect to a test stand having length meter to enable force-displacement measurement.
CB-728	Test stand connection cable for displacement measurement (For EMX-FA)	To connect to a test stand having length meter to enable force-displacement measurement.
CB-908	Open end connection cable	Output cable for loose wire 37 pin (Useful for connection with unique equipment.)

## [Dimensions]

\*Please refer to load cell's specification sheet for each dimensions.

## [Cautions]

- The contents may be changed without previous notice.
- All of products are designed for measurement purpose only.
- Do not copy and use this content without authority.
- Please note that the capacity is dependent on the displayed unit. Please contact us for details.
